

# 4K HDMI WIFI

## Wireless Extender

### Product instructions

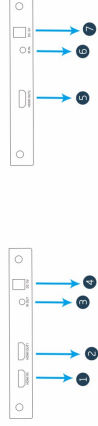

#### ◆◆◆ Product introduction

HDMI extender adopts standard Ethernet TCP/IP protocol, transmits high-definition audio and video signals through wireless WIFI signal, which can realize one-to-many applications, and has excellent image processing and transmission capabilities, making signal transmission smoother and more stable. Economical HDMI signal extension method. This product is widely used in home multimedia, multimedia classrooms, business meetings, live TV, security surveillance, medical care, business and other public service industries. It supports Blu-ray laptops, desktop computers, power amplifiers, cameras, cameras, high-definition players, DVD, IPTV, PS3, game consoles and other high-definition equipment with HDMI output. Plug and play, no need to install software, convenient and fast.

#### ◆◆◆ Product parameters

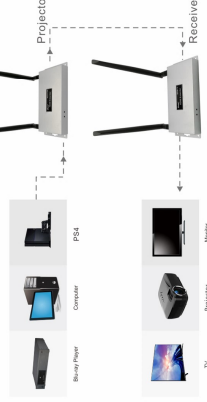

- Transmit HDMI video and audio signals through wireless WIFI, up to 200 meters in open areas;
- Supports 3840\*2160P@30Hz, backward compatible with multiple resolutions;
- Supports H.264, H.265, H.266 format to compress and decompress video, effectively improve transmission efficiency, and ensure the smoothness and stability of playback;
- Support one-to-two long-distance transmission;
- Support IR transmission, remote control signal source or other equipment;
- Able to automatically identify and configure various display modes;
- Built-in automatic equalization system, the picture is smooth, clear and stable;
- This wireless extender supports HDMI signal 3840\*2160P@30Hz resolution, transmits high-definition signals through wireless WIFI signal, uses 5.8G frequency band, can use IR infrared to remotely control equipment, and supports one-to-two transmission.

#### ◆◆◆ Interface introduction

No	Name	Details
1	HDMI IN	HDMI signal input
2	HDMI OUT1	HDMI signal out
3	IR OUT	IR out
4	DC-5V	5V power port
5	HDMI OUT2	HDMI signal out2
6	IR IN	IR in

#### ◆◆◆ Product connection diagram

#### ◆◆◆ Product accessories

- Product x 1 pair
- 5V 2A power supply x 2
- Infrared emission line x 1
- Infrared receiving line x 1
- Black antennas x 4
- User's manual x 1
